

# JEBEL ABU JUDAIDAH - N-SUMMIT - NE-FACE (ca. 1550 m)

18.11.98 "ARGILA" 200m, T.D. inf., 2.5 hours

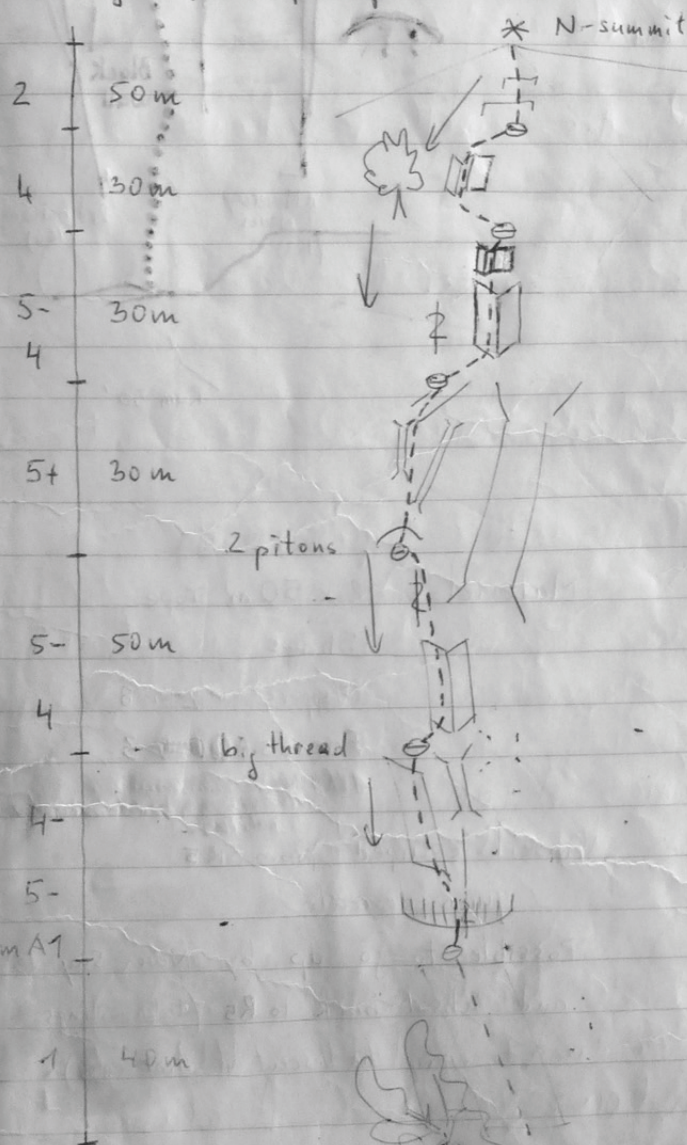

The logical continuation of the "Hidden Cracks" is given by the easiest line that leads to the N summit of Jebel Abu Judaideh. It follows an obvious system of cracks and chimneys through the headwall to the left of the NE-pillar.

At the first ascent we arrived from "de Rumeaux de la Pluie" (No. 20+) (3-4 hours)

The route offers various crack climbing up to a nice top with one artificial creux at the beginning. 1-2 big friends might be useful. Descent by abseil. Slings are in the

Small gear for artificial pitch.

\* Jebel Abu Judaideh

THOUSAND THANKS TO AFA AND ACHMED
